

Silent Violence: Food, Famine, and Peasantry in Northern Nigeria (Geographies of Justice and Social Transformation Ser.)

Why do famines occur and how have their effects changed through time? Why are those who produce food so often the casualties of famines? Looking at the food crisis that struck the West African Sahel during the 1970s, Michael J. Watts examines the relationships between famine, climate, and political economy. Through a longue duree history and a detailed village study Watts argues that famines are socially produced and that the market is as fickle and incalculable as the weather. Droughts are natural occurrences, matters of climatic change, but famines expose the inner workings of society, politics, and markets. His analysis moves from household and individual farming practices in the face of climatic variability to the incorporation of African peasants into the global circuits of capitalism in the colonial and postcolonial periods. Silent Violence powerfully combines a case study of food crises in Africa with an analysis of the way capitalism developed in northern Nigeria and how peasants struggle to maintain rural livelihoods. As the West African Sahel confronts another food crisis and continuing food insecurity for millions of peasants, Silent Violence speaks in a compelling way to contemporary agrarian dynamics, food provisioning systems, and the plight of the African poor.

[Make Oak Ridge Energy Efficient](#)

[Our Mission](#)

Make Oak Ridge Energy Efficient (MORE2), in conjunction with the City of Oak Ridge Electric Department, is upgrading the homes of qualified Oak Ridge community members with free energy-efficient equipment, such as new HVAC and water heating units, which lowers electric bills, improves home comfort, and helps the environment.
