Plant materials may come in the form of gums, juices, essential oils, fatty oils and other similar substances. BOOK #2 PREVIEW

There are many plants out there that can help out. In our world today, many turn to man-made drugs and other chemicals to help them out though, instead of going towards traditional medicine and natural antibiotics. Chemicals might seem fine now, but in actuality, its the first step many take on the pathway to antibiotic resistance and the inability to fight off infections. If one takes man-made antibiotics, there are other complications a well, and at the end of it, you wont be as healthy or feel as good as you normally do. BOOK #3 PREVIEW Essential oils are commonly thought of in our society as just a great way to make your home smell nice. What many people dont think about is the ways they can be used and incorporated into our cooking and other activities in order to improve our health.
