

Project Clear: Social Research and the Desegregation of the United States Army

Clear was the code name for the research that led to the official desegregation of the U.S. Army at the time of the Korean War. This volume represents the two major troop opinion surveys that were the heart of the project, the first examining the performance of black troops in the Korean campaign, and the second, the problems encountered by black soldiers stationed in the continental United States. Although Project Clear dealt with a unique series of events and with a situation that existed for only a few transitional years, its findings were obvious: racial integration worked. Recent years have witnessed renewed expression of racial tension and conflict. This study includes observations applicable to problems still unsolved and to situations yet to be encountered. Apart from such an intimation of future applicability, there is a drama to be found in the transformation of an institution as large and conservative as the army. For the social scientist, there is a particular interest in this example of how large-scale social research, conducted with tremendous speed and under great pressure, can be applied effectively to influence national policy.

Make Oak Ridge Energy Efficient

Our Mission

Make Oak Ridge Energy Efficient (MORE2), in conjunction with the City of Oak Ridge Electric Department, is upgrading the homes of qualified Oak Ridge community members with free energy-efficient equipment, such as new HVAC and water heating units, which lowers electric bills, improves home comfort, and helps the environment.
