

The Road to Serfdom: Illustrated Edition (The Road to Serfdom - Condensed Version - Illustrated)

The Road to Serfdom By Friedrich A. Hayek New Edition The very magnitude of the outrages committed by the National Socialists has strengthened the assurance that a totalitarian system cannot happen here. But let us remember that 15 years ago the possibility of such a thing happening in Germany would have appeared just as fantastic not only to nine-tenths of the Germans themselves, but also to the most hostile foreign observer.

There are many features which were then regarded as typically German which are now equally familiar in America and England, and many symptoms that point to a further development in the same direction: the increasing veneration for the state, the fatalistic acceptance of inevitable trends, the enthusiasm for organization of everything (we now call it planning).

The character of the danger is, if possible, even less understood here than it was in Germany. The supreme tragedy is still not seen that in Germany it was largely people of good will who, by their socialist policies, prepared the way for the forces which stand for everything they detest. Few recognize that the rise of fascism and the road to serfdom.

Marxism was not a reaction against the socialist trends of the preceding period but a necessary outcome of those tendencies. Yet it is significant that many of the leaders of these movements, from Mussolini down (and including Laval and Quisling) began as socialists and ended as fascists or Nazis.

In the democracies at present, many who sincerely hate all of Nazisms manifestations are working for ideals whose realization would lead straight to the abhorred tyranny. Most of the people whose views influence developments are in some measure socialists. They believe that our economic life should be consciously directed that we should substitute economic planning for the competitive system. Yet is there a greater tragedy

imaginable than that, in our endeavour consciously to shape our future in accordance with high ideals, we should in fact unwittingly produce the very opposite of what we have been striving for?
